Presentation

Amoxycare Palatable Drops are presented as a pale red powder containing Amoxicillin Trihydrate equivalent to 750 mg amoxicillin.

The powder should be reconstituted with 12 ml water to give a 15 ml suspension containing amoxicillin at a concentration of 50 mg/ml.

Uses

Amoxicillin is a broad spectrum semi-synthetic penicillin, bactericidal in action. *In vitro* it is effective against a wide range of Gram-positive and Gram-negative bacteria found in dogs and cats including: *Bacillus cereus*, *Bordetella bronchiseptica*, *Corynebacterium* spp., *Citrobacter freundii*, *Chromobacter* spp., *Escherichia coli*, *Flavobacter* spp., *Proteus mirabilis*, *Pasteurella* spp., including *Pasteurella multocida*, *Salmonella* spp., *Staphylococci* (penicillin-sensitive strains) and *Streptococci*.

Amoxycare Palatable Drops are suitable for the control of infections only in dogs and cats caused by susceptible organisms including: infections of the alimentary tract, respiratory tract and urogenital tract; eye and ear infections and skin and wound infections. Use of the product should be based on susceptibility testing of the bacteria isolated from the animal. If this is not possible, therapy should be based on local epidemiological information.

Dosage and administration

Administer orally, using the graduated pipette provided, at a rate of 10 mg/kg bodyweight, twice daily for up to seven days.

The dosage rate of 10 mg/kg is achieved by administering 1 ml of reconstituted product per 5 kg bodyweight. To ensure the correct dosage, bodyweight should be determined as accurately as possible to avoid underdosing.

Contra-indications, warnings, etc

Amoxycare Palatable Drops should not be given to penicillin sensitive animals.

As with other penicillins, amoxicillin should not be used orally or parenterally in rabbits, guinea pigs, hamsters or gerbils. Caution is advised when used in any other very small herbivores.

Operator warning – Penicillin/Cephalosporin sensitivity

Penicillins and cephalosporins may cause hypersensitivity (allergy) following injection, inhalation, ingestion, or skin contact. Hypersensitivity to penicillins may lead to cross reactions to cephalosporins and vice versa. Allergic reactions to these substances may occasionally be serious.

1. Do not handle this product if you know you are sensitised, or if you have been advised not to work with such preparations.
2. Handle this product with great care to avoid exposure taking all recommended precautions.
3. If you develop symptoms following exposure such as a skin rash, you should seek medical advice and show the doctor this warning. Swelling of the face, lips or eyes or difficulty with breathing, are more serious symptoms and require urgent medical attention.

Wash hands after use.

Pharmaceutical precautions

Do not store above 25°C. Shake well before use.

The reconstituted product should not be stored above 25°C, any reconstituted product remaining 7 days after preparation should be discarded.

After the product is re-constituted, using the in-use shelf-life which is specified on this data sheet, the date on which any re-constituted product remaining in the container should be discarded should be worked out. This discard date should be written in the space provided on the carton.

Keep out of the reach of children.

Disposal

Dispose of part used empty bottles in the household refuse. Unused product should be returned to the veterinary surgeon.

Legal category

POM-V

Packaging Quantities

Amoxycare Palatable Drops are packaged in bottles containing Amoxicillin Trihydrate Ph.Eur. equivalent to 750 mg amoxicillin. To enable convenient and accurate dosing a graduated pipette is provided with each pack.
